

Propane

THE CLEAN & GREEN ENERGY

Propane is truly exceptional energy.

Not only does it power your home comfortably, affordably and safely, it also helps protect the environment.

Approved as an alternative fuel by the Clean Air Act of 1990, propane is one of the cleanest burning of all fossil fuels. It's even cleaner than electricity, which, 50% of the time, is generated by coal-burning power plants. Propane is also non-toxic, so it is not harmful to soil or water.

And, because propane appliances are typically more energy efficient than electric appliances, you use less of the earth's natural energy resources, while also cutting your costs. Going green means protecting the environment... and saving money too!

- **Propane Space Heater.** Produces fewer air pollutants and greenhouse gas emissions than oil-burning space heaters. 99.9% efficiency saves you money.
- **Propane Clothes Dryer.** Much more efficient than electric dryers. Uses less energy resources; costs less to operate.
- **Propane Water Heater.** Gives you more hot water at a more affordable price. Rinnai propane tankless water heaters can reduce costs by up to 50% a year and last up to 20 years.
- **Propane Fireplace.** Unlike wood-burning fireplaces, propane fireplaces are clean and do not emit noxious fumes or black smoke into the air.
- **Propane Grill.** Better for the environment than charcoal, which releases 105 times more carbon monoxide than propane.
- **Propane Furnace.** More efficient operation can help lower your energy bills.
- **Underground Tank Storage.** Tanks can be stored underground safely and easily.

Propane furnaces, space heaters and water heaters produce about 50% less complete fuel cycle greenhouse gas emissions than electric appliances produce.

Discover

THE POSSIBILITIES OF PROPANE

You'll Love The Benefits of Propane Gas.

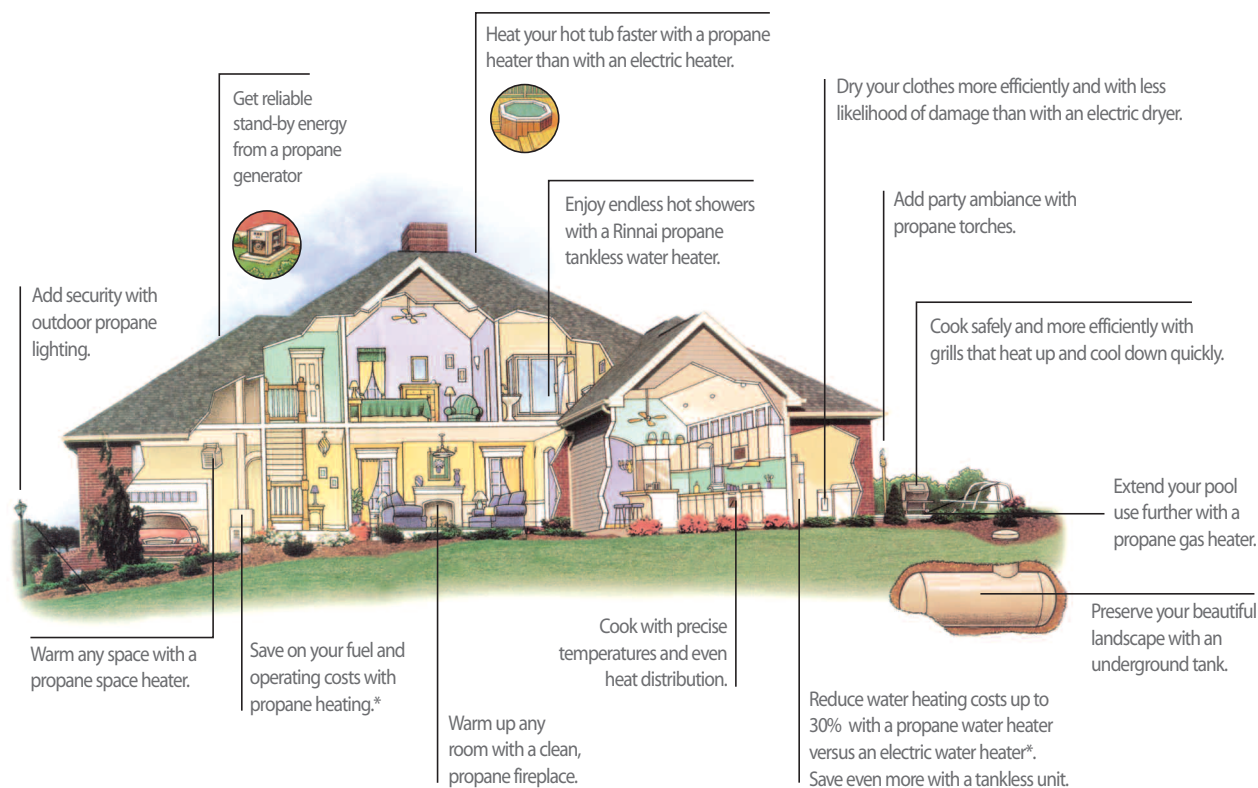

- **It's like natural gas.** Safe, convenient, reliable. The main difference is it's delivered in a truck rather than through a pipeline.
- **Excellent safety record.** Propane's safety record exceeds almost any fuel when appliances are properly installed.
- **Warm & cozy.** Compared with electric heating, propane heating is consistent, warmer and just feels better.
- **Great to cook with.** 97% of professional chefs prefer gas cooking!
- **Powers virtually any appliance.** In and out of the home.
- **Saves you money.** Propane appliances generally cost less to operate than electric appliances.*
- **Greater efficiency.** Because the air gets hotter (120° vs. 90° for electricity), propane heats your home faster and maintains the warmth longer than an electric heat pump.
- **Reliable energy.** When the electricity goes out, propane is in steady supply.
- **Clean & green.** Propane is environmentally friendly because it is non-toxic and creates very low emissions.
- **Tax incentives.** Homeowners who use propane can get tax credits from the federal government.
- **Made in the USA.** While oil comes primarily from overseas, the vast majority of propane gas is manufactured right here at home.

Talk to your builder about using propane, or to learn more, visit our website, www.amerigas.com.

You're going to love the benefits of propane! When natural gas isn't available, propane powers your home with the same comfort, reliability and more, while offering significant advantages over electricity and oil. Talk to your builder about using this great energy source. The more you discover, the more you'll want to choose propane.

The All-AmeriGas Home:

Discover all the ways propane can add comfort and efficiency to your home.

Discover AmeriGas. Your friendly, hometown propane provider.

For comfort and service you can count on, choose AmeriGas as your propane provider. Over a million customers nationwide have done so, and here's why — our local, knowledgeable service professionals are there for you night and day, providing safe, reliable, affordable energy. You can rely on AmeriGas for all of the following:

- **Emergency services** 24 hours a day, 7 days a week.
- **Automatic delivery service** anticipates your propane needs and delivers whether you're at home or not.
- **SmartPaySM Payment Plan** extends your heating costs evenly throughout the year.
- **GAS Check[®] safety inspection** also ensures the efficiency of propane systems in new homes.
- **LineGardSM service** protects against exterior propane gas line damage or malfunction.
- **Expert tank installation** preserves the outside beauty of your home.
- **Customer referral program** offers cash incentives.
- **Brand name propane appliances** with easy monthly payments (not available in all areas).

Propane is everything you want in an energy source. And AmeriGas is everything you need in a supplier. Discover the possibilities at 1-800-AMERIGAS or visit www.amerigas.com
