

Proposition 65 Public Warning

Warning: By-products of the combustion of propane contain chemicals known to the State of California to cause cancer or other reproductive harm.

Safe Drinking Water and Toxic Enforcement Act of 1986, commonly referred to as Proposition 65, requires the governor to publish a list of chemicals “known to the State to cause cancer, birth defects, or reproductive harm.” It also requires California business to warn the public quarterly of potential exposures to these chemicals which result from the products they use, make or distribute.

The Company facilities store propane and distribute propane to wholesale and retail customers in California for various uses. Propane itself is not a listed Proposition 65 chemical. The combustion of propane in appliances, such as stoves or heating systems and vehicles using propane, creates harmful chemicals. These chemicals include carbon monoxide, benzene, formaldehyde and acetaldehyde - All chemicals known to the State to cause cancer and/or birth defects.

The Company encourages all of its customers to use propane safely. You should read and follow all use, care and manufacturer instructions for propane appliances and equipment. Proper ventilation and frequent inspection of propane appliances and equipment are highly recommended. If a gas odor is detected, contact the Company or a qualified service technician immediately.
